SUMMARY

Focused on results Software Engineer with more than one year of commercial experience. Demonstrated ability to collaborate effectively within dynamic teams. Committed to personal and professional growth. Dedicated over 200 hours for lectures and endless hours to coding boot camps acquiring new features and refining existing skills. Never stop learning something new.

Proficient in leveraging LLM's to enhance everyday coding tasks, streamline problem-solving and drive efficiency. Actively incorporating cutting-edge technologies into my skill set, currently immersed in learning and applying cloud solutions, particularly in AWS and MS Azure.

As a proactive team member, I played a key role in developing a testing application for EPAM RD Lab, participated as a developer in an IT Marathon v3.0 conducted by EPAM University Programs, and spearheaded the creation of a volunteer website from inception to deployment using Wordpress CMS. My passion for software development is matched by a track record of successful project contributions and a commitment to delivering quality solutions.

Ready to bring my technical proficiency, collaborative mindset, and enthusiasm for innovation in a dynamic engineering environment. Excited about the opportunity to contribute to impactful projects and continue my professional journey in software development.
